adkris@uw.edu | [aditya-uw.github.io](https://github.com/aditya-uw) | [linkedin.com/in/aditya-uw](https://www.linkedin.com/in/aditya-uw)

## PROFESSIONAL SUMMARY

Electrical and Computer Engineering PhD student at the University of Washington studying signal processing, machine learning, acoustics, and auditory neuroscience, to develop biologically-inspired sensing algorithms.

## EDUCATION

### University of Washington

Seattle, WA

Bachelor of Sciences, Electrical Engineering (Neural Engineering & Signal Processing)

June 2024

- Overall GPA: 3.77 / Major GPA: 3.88
- 2022-2023 Academic Annual Dean's List

## HONORS AND AWARDS

### Undergraduate Research Conference Travel Award

Office of Undergraduate Research

University of Washington, Seattle

Spring 2024

### ECE DEI Conference Travel Award

Electrical and Computer Engineering DEI Committee

University of Washington, Seattle

Spring 2024

### Mary Gates Endowed Research Scholarship

Mary Gates Endowment for Students

University of Washington, Seattle

Winter 2023

## RESEARCH EXPERIENCE

### Undergraduate Researcher

September 2021 – June 2024

Advisor: Professor Wu-Jung Lee, Applied Physics Laboratory

Seattle, WA

- **Main Project:** Used data-driven methods to investigate subsampling for passive acoustic monitoring of bats
- **Data Collection:** Led team efforts between June - December 2023 using **Audiomoths** to record 24-hr ultrasonic acoustic data (roughly 16TB) from 6 locations across a nearby urbanized natural area
- **Soft Skills:** Supervised training of new lab members and wrote instructional material – uploaded to **GitHub** – to assist fieldwork for collecting acoustic data using Audiomoth recorders.

## CAPSTONE PROJECTS

These were senior capstone projects that needed to be ideated, proposed, and prototyped over a 10-week quarter.

### MyoGrind: Bruxism Management Device (Showcase Winner)

Spring 2024

BIOEN 461: Neural Engineering Tech Studio by Professor Kim Ingraham

University of Washington, Seattle, WA

- Led the design of a system that used **Arduino** and **MyoWare** muscle sensors to record EMG from the masseter muscles and detect teeth grinding to notify users via bluetooth, LED indicators, and vibro-tactile stimulation.
- Our team won the final showcase which involved industry experts and medical professionals acting as judges to evaluate our product's value proposition, customer discovery process, and live prototype demo.

### WeatherPatrol: TinyML Rain Prediction using Arduino Nano 33 BLE

Spring 2024

EE 400A: TinyML by Professor Radha Poovendran

University of Washington, Seattle, WA

- Developed and deployed a **TinyML model (F-1 score > 0.8)** on the **Arduino Nano 33 BLE** to read temperature, pressure, and relative humidity from the environment and predict if there would be rain in the next 30 minutes.
- Programmed Nano to invoke **TensorflowLite** model and broadcast predictions over **Bluetooth Low-Energy (BLE)** to bluetooth central devices and equipped system with rechargeable batteries to make device fully deployable.

## SELECTED CONFERENCE PRESENTATIONS

**Krishna A, Lee W-J.** (2024) Investigation of Duty Cycles for Measuring Activity in Passive Acoustic Bat Monitoring. The 186th Meeting of the Acoustical Society of America, Ottawa, Ontario, Canada, May 13-17, 2024.

## TECHNICAL SKILLS

---

**Programming Languages:** Python, MATLAB, Arduino IDE, Java, LaTeX

**Software Libraries:** Pandas, SciPy, NumPy, TensorFlow, Keras, scikit-learn

**Software Development:** Bash, Git/GitHub, VSCode, Conda/Mamba, Jupyter

## RESEARCH SYMPOSIUMS

---

### 26th Annual Undergraduate Research Symposium

May 19th 2023

*University of Washington*

*Seattle, WA*

- Presented on preliminary research on duty cycle-based strategic subsampling for the passive acoustic monitoring of bats to reduce data management costs while collecting representative data.

### 25th Annual Undergraduate Research Symposium

May 20th 2022

*University of Washington*

*Seattle, WA*

- Presented preliminary results of using Bat Detective, a **CNN**-based bat call detector trained on bat calls from Romania and Bulgaria, and explored its success in detecting bat calls collected from Seattle.
